TECHNICAL SKILLS

LANGUAGES

Nepali — Native
English — Fluent

OBJECTIVE

Motivated Grade 12 student specializing in Management with Computer Science and Mathematics, with a strong interest in software development. Actively building real projects with Next.js, TypeScript, and Kotlin while strengthening core skills in Java, HTML, CSS, and Python, with a goal of pursuing app and web development further and gaining hands-on experience through internships.

EDUCATION

Grade 12 — Management with Computer Science & Mathematics

Currently Enrolled · Kathmandu, Nepal

Studying core management subjects alongside Computer Science and Mathematics, building a strong analytical and technical foundation for a future in software and application development.

PROJECTS

PeakPlay API

Next.js · TypeScript · Prisma · Deployed on Vercel

A full-stack web application built with Next.js and TypeScript, using Prisma for database management and deployed live on Vercel.

Hamro Storage

Next.js · TypeScript

A storage-focused web application built with Next.js and TypeScript, developed using modern tooling and configuration for scalable front-end architecture.

Laya Music

Kotlin · Android

A free, open-source, lightweight Android music player focused on fast, ad-free streaming, contributed to as part of the open-source community.

TECHNICAL INTERESTS

ADDITIONAL INFORMATION

Actively self-learning new technologies beyond the classroom, including Java, to strengthen programming fundamentals. Maintains an active GitHub profile with consistent contributions, building and shipping personal projects to gain practical, hands-on experience in app and web development.
